LUXE & THREAD · DOCUMENTATION

EXTERNAL – for the customer

External 01 · High-Level Design – Project Overview

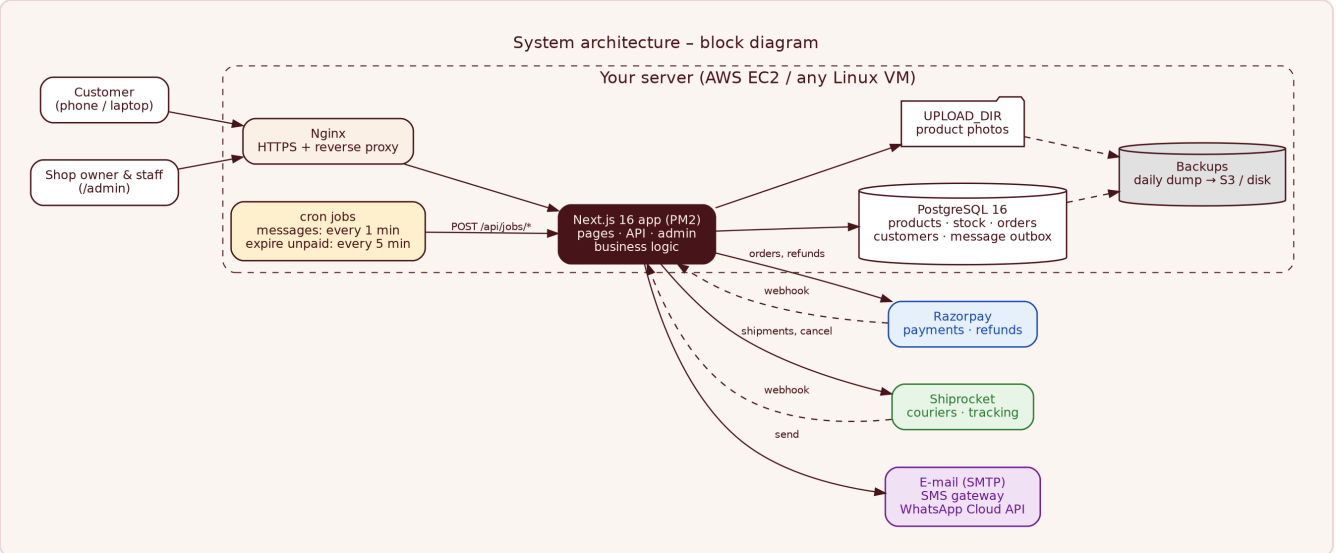

Audience	EXTERNAL – the shop owner and stakeholders
Product	Luxe & Thread online fashion store for India
Version	2.0 · October 2026

1. What you are getting

A complete online fashion shop for **women, men and kids** with a private **admin portal** for running the business day to day.

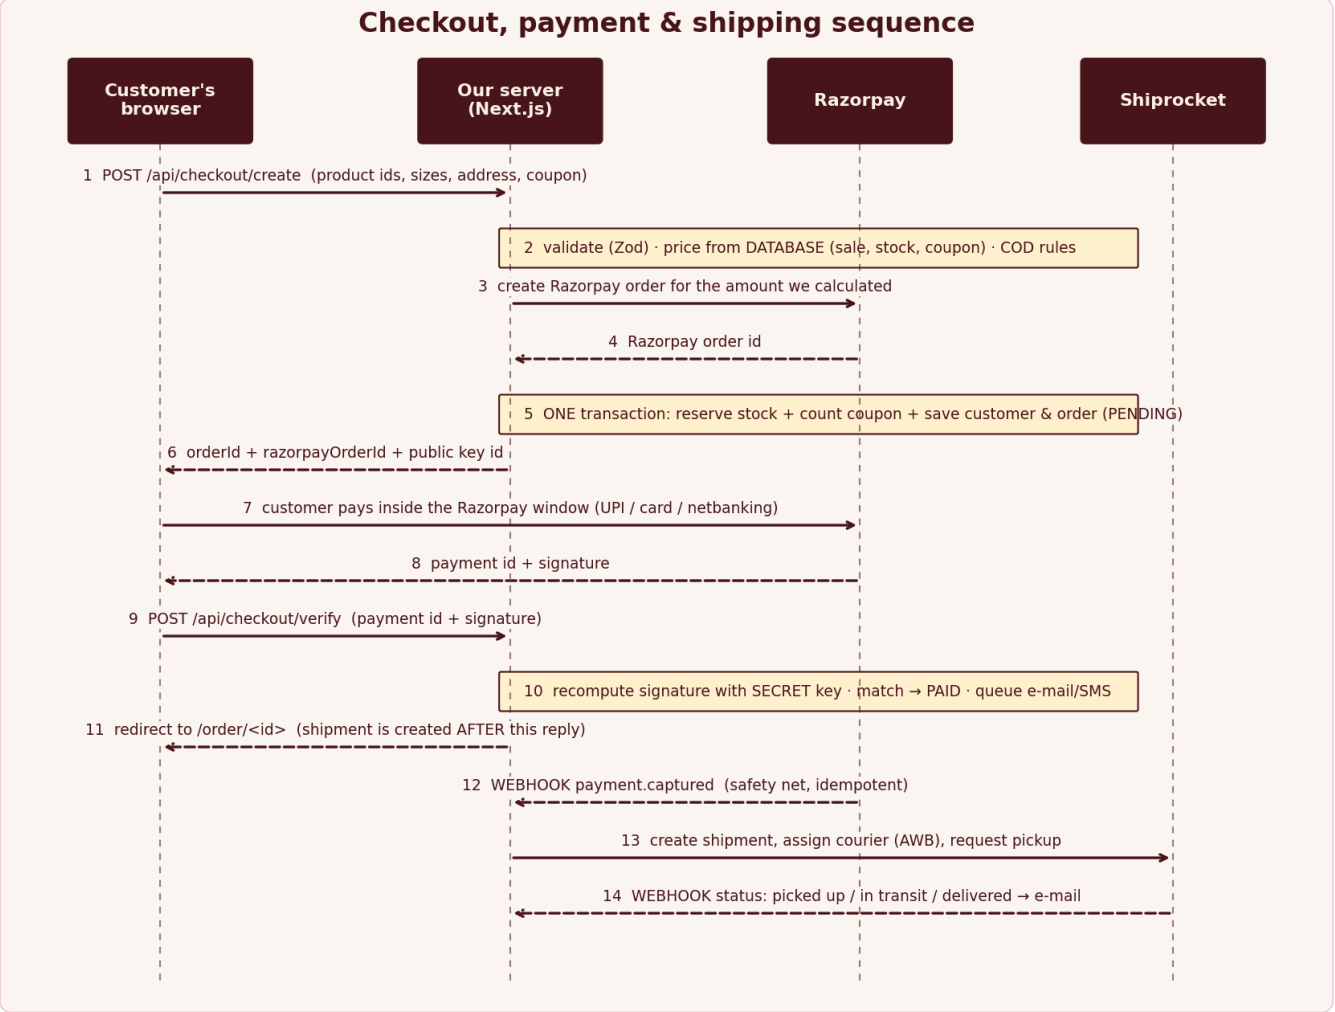

For your customers	For you (owner / staff)
Browse by Women / Men / Kids, search, filters, sale prices	Add products, photos and sizes; change prices; run sales and coupons
Indian size guide, live stock per size	Receive stock, fix stock counts, upload stock by CSV
Pay by UPI, cards, net banking (Razorpay) or Cash on Delivery	See orders, send them to the courier with one click
Track the order, get e-mail/SMS/WhatsApp updates	Sales, profit & loss by day / month / year, downloadable
Cancel an order or request a return online	Approve returns, refund customers
Free delivery across India (PIN-code check)	Send offers to customers who agreed to receive them

2. The big picture

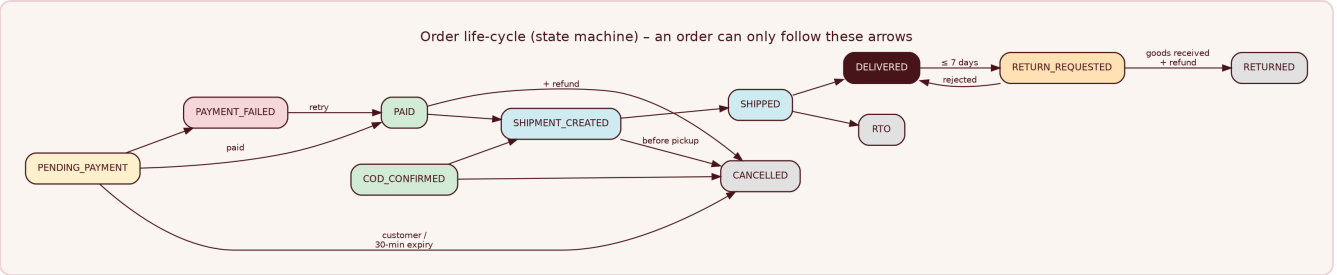

Part	What it does (plain English)
Website + admin	One application: the shop customers see and the private portal you use
Database (PostgreSQL)	The shop's memory: products, stock, orders, customers. Open source and free
Razorpay	Takes the money safely. Card details never touch your website
Shiprocket	Books the courier, gives a tracking number, reports delivery
Messages	E-mail (always), SMS and WhatsApp (optional)
Backups	A copy of everything every night, kept safe, with a monthly "can we really restore it?" test

3. The journey of an order

1. The customer chooses a size and adds to the bag – the **website checks the real price and stock**.
2. They pay on Razorpay's secure page.
3. The website confirms the payment two ways (browser *and* Razorpay's own call) so no paid order is ever lost.
4. The order goes to Shiprocket; a courier collects it; the customer is told at every step.
5. You see everything in the admin portal.

4. Order stages

5. What is included

Storefront · admin portal (products, stock, inventory, coupons, orders, returns, customers, expenses, reports, messages, activity log) · payments · shipping · notifications · cancellation & returns · backups · documentation · automated tests.

6. What you need to provide

Business details (name, address, GSTIN), Razorpay and Shiprocket accounts with KYC, real product photos, your GST rates (from your CA), policy texts reviewed by a lawyer, a domain name, and a server (guide provided).

7. Responsibilities

You	Your technical partner
Packing, handing parcels to the courier, customer replies, price & stock decisions	Hosting, updates, backups checks, security, new features

8. Honest limits of this version

Product photos supplied are placeholders · GST invoice PDFs and wishlist/reviews are not included yet · SMS and WhatsApp need provider approvals (TRAI/DLT, Meta templates) before they can be switched on · single-server hosting (very suitable for a growing boutique; scale-out path documented).

9. Documents for you

Admin Portal Guide · Admin Dashboard & Reports Guide · Customer Handover · Go-Live Checklist
