EXTERNAL – for the customer

External 03 · Admin Dashboard & Reports Guide

Audience	EXTERNAL – shop owner (reports are owner-only)
Version	2.0 · October 2026

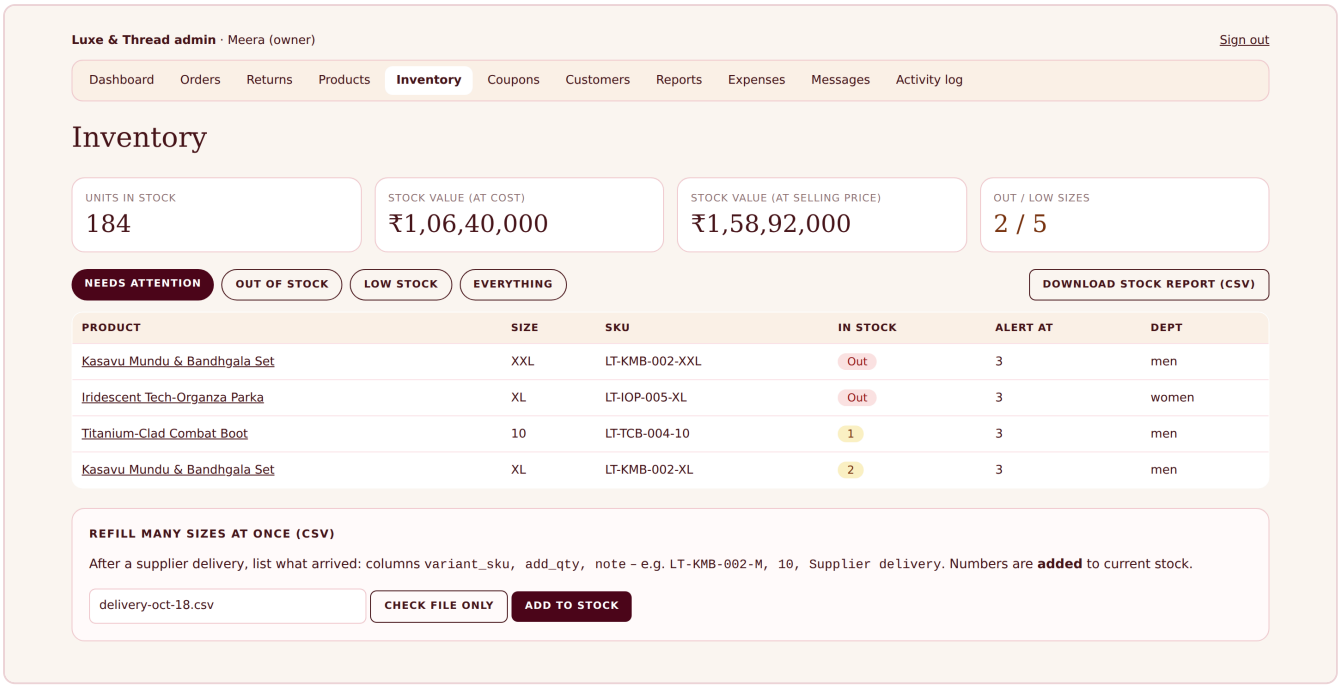

1 · The dashboard

Card / panel	What it tells you	What to do
Orders to ship	Paid or COD orders not yet booked with the courier	open each, **Create shipment**
Return requests	customers waiting for your answer	Returns → approve / reject
Low stock sizes / out of stock	sizes at or below their alert level	reorder; add stock when it arrives
Messages failed	customer messages that could not be sent	Messages → Retry

Card / panel	What it tells you	What to do
Today / This month / This year	net sales (after refunds, incl. GST), orders, units, and **profit or loss**	compare with your target
Last 7 days	bar chart of net sales per day	spot slow days
Best sellers (30 days)	top products by revenue	reorder winners
Low stock	the 8 sizes closest to selling out	restock

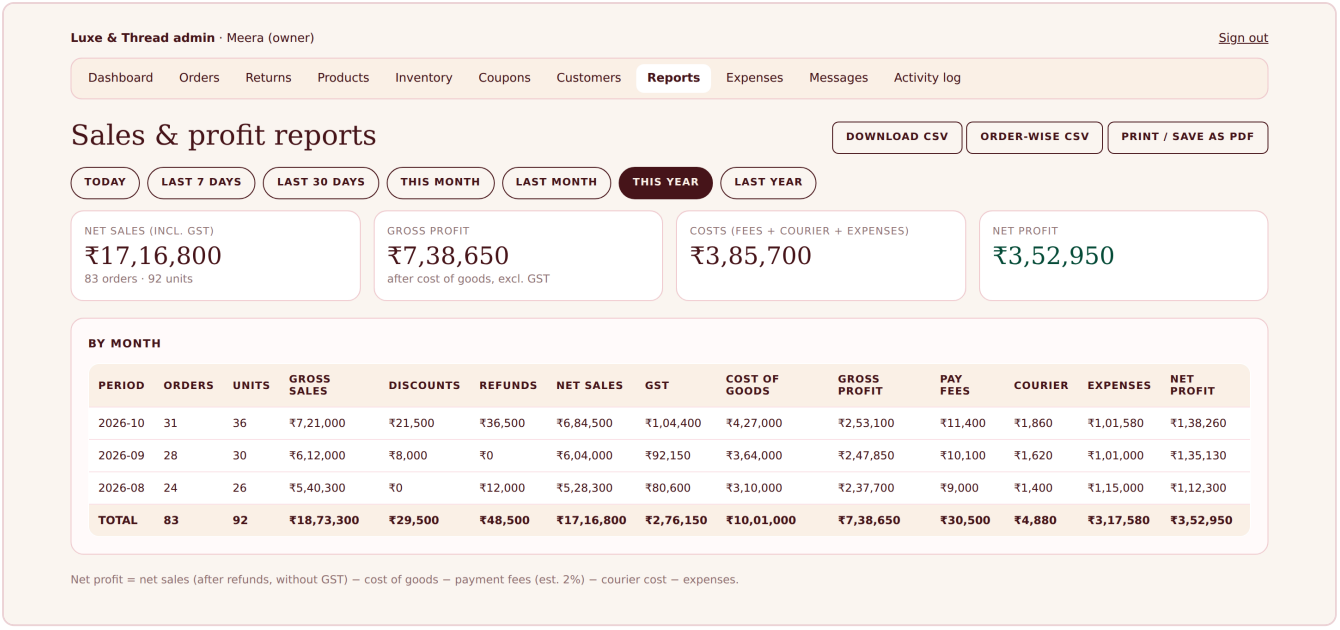

2 · Stock: in stock and out of stock

Inventory lists every size that is **out of stock** or **low**, shows **units in stock** and the **value of your stock** (at cost and at selling price), and has a download button for the full stock report.

- *Low* = at or below the size's alert level (default 3).
- **Out of stock** sizes appear greyed and cannot be bought by customers.

3 · Sales & profit reports

3.1 Choosing the period

Click a preset: **Today · Last 7 days · Last 30 days · This month · Last month · This year · Last year**, or pick **From / To** dates and press **Show**. **Group by** day, month or year gives the daily, monthly and yearly views. All dates use **Indian time** (a 11:30 pm order counts for that day).

3.2 What each column means

Column	Meaning
Orders / Units sold	number of orders and pieces
Gross sales	what customers paid (incl. GST)
Coupon discounts	discounts you gave through coupon codes
Refunds / returns	money returned (cancellations after payment, returns, returned-to-origin)
Net sales	gross sales − refunds
GST included	tax portion of net sales – belongs to the government, not profit
Net sales (excl. GST)	your real revenue
Cost of goods	cost price × units sold (returned goods are not counted)
Gross profit	revenue − cost of goods
Payment fees (est.)	estimated gateway cost (default 2 % of online payments)
Courier cost	what you typed on each order as the courier's charge
Other expenses	from the **Expenses** page
Net profit / (loss)	gross profit − fees − courier − expenses. **Negative = loss**

3.3 Worked example (one order)

Customer pays **₹1,180** (incl. 18 % GST), product cost **₹400**, paid online, courier charged **₹60**. GST = 1,180 − 1,180/1.18 = **₹180** → revenue excl. GST **₹1,000** → gross profit **₹600** → fees 2 % of 1,180 = **₹23.6** → net profit = 600 − 23.6 − 60 = **₹516.4** (before shop expenses).

3.4 Downloads

Button	File	Use
Download CSV	profit & loss table for the chosen period	accountant, Excel
Order-wise CSV	one row per order with GST, cost, courier, refund	detailed checks
Print / Save as PDF	the report page, print-friendly	share or archive (choose "Save as PDF" in the print window)
Inventory → *Download stock report*	every size, stock, value	stock-taking
Orders → *Download orders*	order list	reconciliation
Customers → *Download customer list*	customers and consent	marketing (owner)

CSV files open in Excel and Google Sheets.

4 · How to make the numbers trustworthy

1. Enter **cost price** on every product (otherwise profit looks too high).
2. Enter the **courier charge** on orders (Shiprocket billing shows it).
3. Add **expenses** (rent, ads, salaries, packaging) – monthly is enough.
4. Confirm **GST rates** with your CA.
5. Check the **payment fee %** with your Razorpay plan (your developer can change it).
   Profit here is a **management estimate** to guide decisions – your CA's books are the official figures.

5 · Suggested routines

When	What
Daily (5 min)	Dashboard: orders to ship, returns, low stock, failed messages
Weekly	Reports → *Last 7 days* (group by day); best sellers; reorder low stock
Monthly	Reports → *Last month* (group by day) + *This year* (group by month); add expenses; download CSV for your CA; stock-take
Yearly	Reports → *Last year* (group by month); download all CSVs for tax time
