LUXE & THREAD · DOCUMENTATION

EXTERNAL – for the customer

External 04 · Customer Handover Document

Project	Luxe & Thread – fashion e-commerce for India
Version	2.0.0
Delivered to	[CUSTOMER NAME]
Delivered by	[YOUR NAME / COMPANY]
Date	[DD-MM-YYYY]

1 · Summary

A complete online fashion shop for women, men and kids with online payment (Razorpay), courier booking and tracking (Shiprocket), automatic customer messages, cancellations and returns, an admin portal with stock, discounts, coupons, customers, reports and profit & loss, plus documentation and automated tests. Overview: External 01.

2 · What is delivered

#	Item	Where
1	Source code (Next.js 16, React 19, TypeScript, PostgreSQL 16)	Git repository
2	Database schema + demo data	`db/`
3	Admin portal and storefront	the website
4	Documentation – *internal* (developers) and *external* (you)	`docs/` – Markdown and PDF
5	Automated tests (unit, integration, end-to-end, load)	`src/lib/__tests__`, `tests/`

3 · Features

Area	Included
Storefront	Women / Men / Kids / New / Sale / About / Contact, search, filters, sort, sale prices, photo gallery, Indian size guide, live stock per size, PIN-code delivery check
Bag & checkout	prices and stock verified by the server, coupons, Indian address form, UPI/cards/net banking, Cash on Delivery (switchable), marketing consent boxes (un-ticked)
Orders	tracking page for customers, cancel / return requests, automatic refunds, e-mail (and optional SMS/WhatsApp) updates
Admin	products, sizes, stock receive & stock-take, CSV import, photos, discounts & festival sales, coupons, orders, shipments, refunds, returns, customers & campaigns, expenses, reports, activity log

Area	Included
Operations	health check, backups with restore procedure, background jobs, security headers, rate limits, audit log

4 · Accounts & ownership (complete at handover)

Account	Owner / login e-mail	2-factor on	Notes
Domain & DNS		☐	
Cloud server (AWS)		☐	
GitHub repository		☐	customer is *owner*
Razorpay		☐	live keys with customer
Shiprocket		☐	API user created
E-mail/SMTP		☐	
Backup bucket (S3)		☐	
Admin portal users		–	one login per person

Credentials are shared only through a password manager – never by chat or e-mail.

5 · Verification status – honest summary

Check	Status
Strict TypeScript check of the whole project	✅ passes
Code-quality check (ESLint)	✅ passes
23 automated tests of business rules	✅ pass
Production build, PostgreSQL integration tests, browser tests, load tests	⏳ to be run on the delivery server – procedures in the test plan
Razorpay test payments, Shiprocket booking, e-mail delivery	⏳ to be run with your accounts in TEST mode
Live payments	⏳ after KYC and the Go-Live Checklist

Screens in the Admin Guide use sample data.

6 · Acceptance checklist

#	Test	Pass	Initials
1	Shop opens on your domain over HTTPS; Women/Men/Kids work	☐	
2	Size guide shows Indian charts; sold-out sizes cannot be chosen	☐	
3	Add to bag, change quantity, apply a coupon	☐	
4	Checkout rejects wrong phone/PIN with clear messages	☐	
5	Test-card payment succeeds → order *Paid*; e-mail received	☐	
6	Failed payment → friendly message, bag kept	☐	
7	Close the tab after paying → order still becomes *Paid*	☐	
8	Shipment appears in Shiprocket; tracking number saved	☐	

#	Test	Pass	Initials
9	Courier status updates the order; delivered e-mail sent	☐	
10	Customer cancels a paid order → refund + stock back	☐	
11	Return request → approve → goods received → refund	☐	
12	Admin: add product, receive stock, discount, mark out of stock	☐	
13	CSV import of products and stock refill work	☐	
14	Reports show correct day/month/year numbers; CSV downloads open	☐	
15	Campaign reaches only opted-in customers; unsubscribe works	☐	
16	Backup ran last night; a restore drill was done	☐	
17	Policy pages show your real business details	☐	
18	One real small payment on LIVE and refund	☐	

7 · Responsibilities after handover

Task	Who	How often
Pack and hand over parcels, reply to customers	You	daily
Dashboard check, ship, returns, stock	You	daily
Update stock, prices, discounts, photos	You	as needed
Recharge Shiprocket wallet, reconcile Razorpay	You	weekly
Health checks, backups check, security updates	Technical partner	daily/weekly/monthly
New features, fixes, deployments	Technical partner	as agreed
GST, accounts, legal pages	Your CA / lawyer	as needed

8 · Known limitations

GST invoice PDFs not included · wishlist/reviews not included · photos supplied are placeholders · SMS and WhatsApp need TRAI/DLT and Meta approvals · one-server hosting · Shiprocket return pickups are created in its panel.

9 · Support & warranty

[Define warranty period, response times, scope (bug fixes vs new features), contact.]

10 · Change log

Version	Date	Changes
2.0.0	[date]	Women/Men/Kids navigation, size system, PostgreSQL, inventory, discounts & coupons, admin portal, reports & P&L, notifications, cancellation & returns, customers & campaigns, full documentation
1.0.0		First storefront with cart, Razorpay, Shiprocket
