LUXE & THREAD · DOCUMENTATION

EXTERNAL – for the customer

External 05 · Go-Live Checklist

Audience	EXTERNAL – owner with your technical partner
Rule	The software does not change between test and live – only accounts and values do.

A · Paperwork (start early – takes days)

- ☐ Business registration, PAN, bank account in the business name
- ☐ GST registration and your CA's confirmation of **GST rate and HSN code for each product**
- ☐ Domain bought; DNS access available
- ☐ **Razorpay KYC** approved; **Shiprocket KYC** approved; wallet recharged; pickup address verified; API user created
- ☐ Business e-mail (support@…); e-mail sending set up (SPF/DKIM)
- ☐ Two-factor login on every account

B · Content

- ☐ Real **photos** for every product (4:5 portrait, under 300 KB)
- ☐ Prices, **MRP**, **cost price**, weights and sizes entered for every product
- ☐ Business details (legal name, address, phone, GSTIN, grievance officer) in the site settings
- ☐ Policy pages (Privacy, Terms, Shipping, Refund & Cancellation, Contact) **reviewed by a lawyer**; About Us written
- ☐ Packing-box size and product weights measured
- ☐ Delete demo products; remove demo coupon if not needed

C · Technical (your partner ticks these)

- ☐ Server, HTTPS, database, cron jobs and **backups** running; one **restore drill** passed
- ☐ Live Razorpay keys + **new live webhook**; live Shiprocket webhook; secrets are new
- ☐ E-mail sends from your domain; SMS/WhatsApp only after approvals
- ☐ Health check list completed
- ☐ Monitoring/alerts on

D · Live rehearsal (use a real small amount)

1. [ ] Add a ₹10 test product (hidden from the menu or deleted afterwards).
2. [ ] Pay online → order *Paid* → shipment visible in Shiprocket (cancel it there) → e-mail received.
3. [ ] **Cancel** the order from the customer page → refund arrives; stock returns.
4. [ ] COD order (if enabled) → cancel.
5. [ ] Check one real PIN code on a product page.
6. [ ] Remove the test product.

E · First week

- ☐ Dashboard morning check; Razorpay vs portal match every day
- ☐ Watch for failed messages and shipping errors
- ☐ Tell your partner about anything confusing

F · Rollback plan

If payments misbehave on day one: your partner removes the online-payment keys (checkout then says payment is not configured) or puts up a maintenance page; the problem is fixed on the test setup; then re-released. Orders already taken stay safe in the database and in Razorpay.
